## KX-T2371

*The new ITS series has been developed in response to the advanced needs of the epoch. The KX-T2371 combines 13-Station One-Touch/Speed Dialing Numbers with a host of other efficiency enhancing features -- including One-Touch Redial and Data Port. And it introduces sophisticated styling that helps give your office an impressive look while providing powerful back-up for maximizing business performance.*

### Outstanding Features with Built-In Quality

#### Data Port

A second jack on the back of the phone allows you to connect a computer, modem, fax machine, answering machine or other single line device.

#### 13-Station One-Touch/Speed Dialer

10 one-touch dialing buttons are ideal for storing emergency or frequently-dialed numbers. You can also store and retrieve 3 phone numbers for 2-step speed dialing. A total of 13 stations will save you time when searching for, and dialing numbers.

#### One-Touch Redial

This function dials the number that you most recently used. If the line's busy when you call, just press the redial button to call back -- it's fast and easy.

#### Timed Flash

This function, which is necessary for Call Waiting and PBX (switchboard) use, makes sure that you won't accidentally cut the line while a call is on hold.

#### Swichable Tone/Pulse Settings

You can change between tone (pushbutton) and pulse (rotary) dialing, even while dialing. This ensures that the KX-T2371 will work on both tone and pulse type phone lines.

#### Insertable Pause

This function lets you insert a dialing pause anywhere you want into a phone number to meet the dialing requirements of your PBX. It's a handy function for redialing.

#### One-Touch Tone Switching

Allows you to temporarily switch from pulse dialing to tone dialing at the press of a button.

#### Wall Mountable

There's no need to worry if you can't find a suitable place to put your KX-T2371. You can mount it right on the wall for functional use.

#### Additional Features

*Ringer Indicator*

*3-step ringer selector: off/low/high*

*Telephone line-powered operation*
